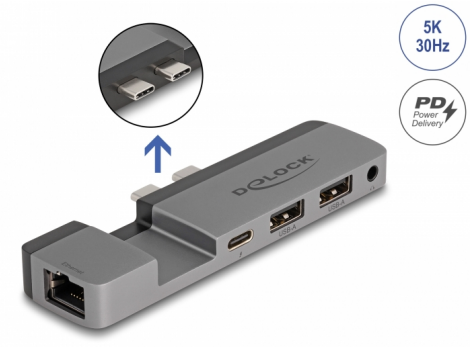
Delock Docking Station for MacBook Pro / MacBook Air Thunderbolt™ 4 with 5K Resolution / 100 W PD / 10 Gbps Hub / LAN / Audio

Description

This docking station by Delock can be connected to a MacBook Pro with two adjacent Thunderbolt™ 4 ports. A Thunderbolt™ device can be connected to the **Thunderbolt™ 4 port** (pass-through). **Two built-in USB Type-A ports** allow the use of peripherals. Connections for **headset and Gigabit network** complete the features.



Item no. 87757

EAN: 4043619877577

Country of origin: China

Package: Retail Box

Thunderbolt™ 4 port

All Thunderbolt™ devices, such as docking stations, SSDs or monitors, can still be connected to the Thunderbolt™ 4 pass-through connector. In addition, Thunderbolt™ supports DP Alternate Mode, allowing HDMI, DisplayPort or DVI monitors to be connected with appropriate adapters. This port can also be used to charge the MacBook, since the **Power Delivery** function (USB PD 3.0) is also supported with up to **100 watts**.

Gap for MagSafe 3

The docking station is specially designed with a **gap** at the point where the **MagSafe charging port** is located on the MacBook. This allows the MagSafe power supply to continue to be used, even if the Delock docking station on the MacBook is used.

Small sturdy helper

Due to its **small dimensions and its sturdy housing**, this Delock docking station is particularly suitable for travelling. It can simply be packed into the bag together with the laptop and used as needed.

Specification

- Connectors:
  2 x Thunderbolt™ 4 male
  1 x Thunderbolt™ 4 female (pass-through)
